Jan-Mar

The following report analyzes suburban bus service performance during the period January-March, 1982, and is comprised of the following four elements.

General Financial and Patronage Results: compares 1982 carrier expense, revenue, deficit, and ridership with 1981 levels. Also includes summary patronage statistics at the route level.

Overall Service Performance: provides comparative carrier rankings using indicators that measure both efficiency (service supplied) and effectiveness (service consumed).

Route Productivity Rankings: presents passenger trip productivity rankings by route. Includes a listing of poorly performing services, which are targeted for more detailed analysis.

Cost Analysis: analyzes carrier unit costs by transit function, using peer comparisons.

It should be noted that this report does not include the analysis of RTA paratransit service.

List of Tables

General Financial and Patronage Results

- I-1. Summary Financial Results (January-March, 1982)
- I-2. Suburban Bus Financial Results (January-March, 1981 and 1982)
- I-3. Summary Patronage Results
- I-4. Comparative Patronage Data by Carrier (January-March, 1982)
- I-5. Average Daily Patronage (January-March, 1982)

Overall Service Performance

- II-1. Selected Performance Indicators by Carrier (January-March, 1981 and 1982)
- II-2. Ranking of Carrier Service Performance Based on Selected Factors (January-March, 1982)

Route Productivity Rankings

- III-1. Routes Targeted for Detailed Analysis by Service Group and Service Day (January-March, 1982)

Cost Analysis

- IV-1. Comparative Cost Ratios (January-March, 1982) - Ten Largest Carriers
- IV-2. Total Expense per Operating Unit - Ranked by Carrier
- IV-3. Operations Expenses per Vehicle Hour (January-March, 1982) - Ranked by Carrier
- IV-4. Vehicle Maintenance Expenses per Vehicle Mile (January-March, 1982) - Ranked by Carrier
- IV-5. Administration Expenses per Vehicle Hour (January-March, 1982) - Ranked by Carrier

Appendices

- A. Suburban Bus Route Ridership by Service Day (January-March, 1981 and 1982)
- B. Inner Suburban Route Productivities by Service Day (January-March, 1982)
- C. Outlying Suburban Route Productivities by Service Day (January-March, 1982)
- D. Feeder Route Productivity Ranking (January-March, 1982)

Abbreviations

The following abbreviations are used throughout the report:

AUR	Aurora	NPR	Naperville
BNS	Bensenville	NOR	NORTRAN
CNT	Contract Carrier	SFW	South Suburban SafeWay
ELG	Elgin	SUB	Suburban Transit
HPK	Highland Park	WTN	West Towns
JOL	Joliet	WKG	Waukegan
NIL	Niles	WLM	Wilmette
IN	Inner Suburban Carrier/Route	WKDY	Weekday
OT	Outlying Suburban Carrier/Route	SAT	Saturday
FD	Feeder Route	SUN	Sunday
		HOL	Holiday

I. GENERAL FINANCIAL AND PATRONAGE RESULTS

During the period January-March, 1982, combined suburban bus system expenses totalled \$8,512,275. The four major suburban carriers¹ (NORTRAN, SafeWay, Suburban Transit, and West Towns) accounted for nearly 67 percent of this total. The satellite carriers² (Aurora, Elgin, Joliet, and Waukegan) comprised another 16 percent of combined system expenses, while the shares for contract and other subsidized carriers were 11 and 6 percent, respectively. Summary information regarding these and other quarterly financial results are presented below.

Table I-1
SUMMARY FINANCIAL RESULTS (JANUARY-MARCH, 1982)

	<u>Expense</u> (%)	<u>Revenue</u> (%)	<u>Deficit</u> (%)
Major Suburban	\$5,688,013 (66.8)	\$2,018,772 (68.7)	\$3,669,241 (65.8)
Satellite Carriers	1,375,415 (16.2)	332,787 (11.3)	1,042,628 (18.7)
Other Subsidized	515,163 (6.0)	251,649 (8.6)	253,514 (4.7)
Contract Carriers	<u>933,684 (11.0)</u>	<u>336,387 (11.4)</u>	<u>597,297 (10.8)</u>
System Total	\$8,512,275 (100.0)	\$2,939,595 (100.0)	\$5,572,680 (100.0)

Carrier-specific and prior year financial data are presented in Table I-2. As can be seen, total system expenses have declined 25 percent, as compared to 1981 levels; with reported decreases due primarily to cutbacks in service imposed as a result of inadequate funding. The loss in patronage that has resulted from these reductions in service have served to decrease suburban bus revenues by \$704,931 (-19.3%). It should be noted that other factors have also contributed to ridership/revenue losses, including the state of the economy (e.g., increased unemployment levels reduces the number of home-to-work trips); service suspensions (riders forced to find alternative modes may be reluctant to return); and fare increases. As can be seen in Table I-3, these various factors are continuing to have a significant impact on overall patronage (and hence revenues), with total system ridership down by 3,057,087 passenger trips, or 31.5 percent. However, since overall expense reductions have more than offset reported declines in revenue, system deficit requirements have decreased, for the quarter, by \$2,155,131 (-27.9%).

¹ Major suburban carriers include systems that serve the inner-suburban ring of the Region, and are the four largest suburban carriers, requiring 51% of the suburban system's peak vehicles.

² Satellite carriers are those systems that serve the four satellite cities of the Metropolitan area. As a group, these carriers account for 17% of the suburban bus system's peak vehicles.

TABLE 1-2: SUBURBAN BUS FINANCIAL RESULTS (JANUARY-MARCH, 1981 AND 1982)

	Expense			Revenue			Deficit		
	1981	1982	Change (%)	1981	1982	Change (%)	1981	1982	Change (%)

Table I-3
SUMMARY PATRONAGE RESULTS

	<u>Jan-Mar 1981</u> <u>Pass. Trips</u>	<u>Jan-Mar 1982</u> <u>Pass. Trips</u>	<u>Change</u>	<u>(%)</u>
Major Suburban	6,677,288	4,486,255	-2,191,033	(-32.8)
Satellite Carriers	1,668,547	1,049,788	- 618,759	(-37.1)
Other Subsidized	614,033	568,526	- 45,507	(- 7.4)
Contract Carriers	<u>750,608</u>	<u>548,820</u>	- 201,788	(-26.9)
System Total	9,710,476	6,653,389	-3,057,087	(-31.5)

Comparative patronage data on a carrier-specific basis are provided in Table I-4. As can be seen, all carriers reported losses in ridership during the quarter, except Wilmette (which indicated an 8 percent increase). As stated previously, most declines are believed to be the result of reduced service levels and other factors.

Average daily ridership by service day (weekday, Saturday, Sunday/holiday), and by route, is shown in Appendix A. This listing includes all suburban bus routes operated during January-March, 1982. In reviewing Appendix A, it is apparent that the level of patronage varies greatly by route. For example, the service attracting the highest level of patronage was NORTRAN Route #290/291 (Touhy), averaging 4,437 passenger trips per weekday. In contrast, contract route #800 (Richmond) averaged only nine passenger trips per day.

Table I-5 AVERAGE DAILY PATRONAGE
(JANUARY-MARCH, 1982)

*1982 service levels are below 1981 levels for most carriers.

**Reported ridership adjusted to reflect current estimating method used since electronic fareboxes were installed during August, 1981.

II. OVERALL SERVICE PERFORMANCE

Table II-1 presents selected performance indicators, by carrier, for the period January-March, 1981 and 1982. As can be seen, revenue per passenger trip has increased for virtually all carriers; the result of fare increases imposed on July 6, 1981. However, due to overall reductions in ridership, the calculated values for expense per passenger trip and deficit per passenger generally increased during the quarter.

General carrier service performance may be summarized as follows:

Table II-2
RANKING OF CARRIER SERVICE PERFORMANCE
BASED ON SELECTED FACTORS
(JANUARY-MARCH, 1982)

<u>Rank</u>	<u>System</u>	<u>Deficit/ Pass. Trip</u>	<u>Rank</u>	<u>System</u>	<u>Revenue/Cost</u>
1	Wilmette	\$0.21	1	Niles*	66.2%
2	Niles*	\$0.31	2	Wilmette	62.8%
3	Elgin	\$0.57	3	Glen Ellyn	54.3%
4	Glen Ellyn	\$0.64	4	NORTRAN	40.2%
5	NORTRAN	\$0.65	5	Contract	36.0%
			6	SafeWay	34.6%
	SYSTEM AVERAGE	\$0.84		SYSTEM AVERAGE	34.5%
6	SafeWay	\$0.91	7	West Towns	32.7%
6	West Towns	\$0.91	8	Elgin	32.4%
8	Highland Park	\$0.92	8	Naperville	32.4%
9	Naperville	\$1.05	10	Highland Park	30.0%
10	Contract	\$1.09	11	Waukegan	26.1%
11	Aurora	\$1.14	12	Suburban	25.8%
12	Joliet	\$1.19	13	Joliet	21.1%
13	Suburban	\$1.33	14	Aurora	19.3%
14	Waukegan	\$1.80	15	Bensenville	16.5%
15	Bensenville	\$2.06			

*The Niles system is unique among RTA subsidied carriers in that fares are free. The Village subsidizes the service to the extent of actual patronage as applied to base adult fare.

It can be easily seen that the range of performance varies widely among systems. The villages of Niles and Wilmette provide services which exhibited the highest levels of performance. Systems with generally lower levels of performance include Bensenville, Waukegan, Suburban Transit, Aurora, and Joliet. More detailed analyses should be completed for these carriers in order to identify possible actions designed to improve comparative performance.

TABLE II-1: SELECTED PERFORMANCE INDICATORS BY CARRIER
(JANUARY-MARCH, 1981 AND 1982)

	Expense Per Pass. Trip		Revenue Per Pass. Trip		Deficit Per Pass. Trip		Revenue As A Percent of Cost

III. ROUTE PRODUCTIVITY RANKINGS

As another element of this report, route productivity rankings have been prepared for each service group. Specifically, a passenger trip productivity index was computed for each route to measure the extent to which a particular service was utilized (passenger trips) versus the quantity of service supplied (revenue hours or number of vehicles required). This index was then used to rank each route, as shown in Appendices B, C, and D.

The primary purpose in presenting route level statistics in this fashion is to identify those routes requiring additional attention because of their relatively low level of performance. As such, the productivity rankings are intended only as a way to target certain services for detailed analysis and the development of specific service actions. Such actions may eventually include adjustments in routing, reduction in service, elimination of service, improvements in the quality of service provided, or improved marketing efforts.

Based on route productivity rankings compiled for the period January-March, 1982, the following routes were identified as having productivity levels less than 50 percent of respective system averages, and as such, should be analyzed in more detail.

Table III-1
 ROUTES TARGETED FOR DETAILED ANALYSIS
 BY SERVICE GROUP AND SERVICE DAY
 (JANUARY-MARCH, 1982)

Inner Suburban Services - Weekdays

Total Number of Such Routes: 64
 Average System Productivity: 40.3 passenger trips/revenue hour
 Number of Targeted Routes: 13 (20.15 pass. trips/rev. hr. or less)

IV. COST ANALYSIS

As a final element of this report, an analysis of operating costs was made for the ten largest subsidized carriers. Contract services were excluded from this analysis since expenses are fixed contractually. The analysis is based on measuring quarterly carrier costs for specific transit functions on a vehicle mile and vehicle hour basis. In addition, subsequent reports will show carrier unit costs over time, in order to detect improving or worsening conditions. Carrier unit costs have been organized by function according to three major areas: Operations, Vehicle Maintenance, and Administration.

It should be noted that some variation in unit costs among carriers are the result of factors outside of the carriers direct control. Some of these factors are listed below, and should be carefully considered in any attempt to compare carrier performance:

- The age or type of vehicles, equipment, and facilities will all serve to impact cost levels. For example, are the vehicles air-conditioned, are the garages new or old, are facilities shared, etc.?
- Manpower costs may vary by carrier, according to contractual requirements and work rule provisions.
- Privately owned carriers incur additional expenses due to taxes.
- Some municipalities absorb the cost of certain functions, such as Non-Vehicle Maintenance.
- Definitional differences of transit functions. For example, Wilmette reports most supervisory personnel expense as Other Labor Operations Cost, as opposed to Administration Cost.

Table IV-1 presents January through March, 1982 results for the ten carriers considered. In all, 62.6% of total system expenses were reported as Operations, 24.0% as Vehicle Maintenance, and 13.4% as Administration. A ranking of total expense per operating unit is shown in Table IV-2.

TABLE IV-1: COMPARATIVE COST RATES (JANUARY-MARCH, 1982)--TEN LARGEST CARRIERS

*Includes Non-Vehicle Maintenance Expenses

Table IV-2
TOTAL EXPENSE PER OPERATING UNIT--Ranked by Carrier

<u>Total Expense Per Vehicle Mile</u>		<u>Total Expense Per Vehicle Hour</u>	
Highland Park	\$1.33	Highland Park	\$20.36
Wilmette	\$1.58	Wilmette	\$20.88
Joliet	\$1.69	Aurora	\$24.23
Waukegan	\$1.72	Elgin	\$26.09
NORTRAN	\$1.83	Joliet	\$26.51
Aurora	\$1.85	NORTRAN	\$27.74
Elgin	\$1.96	Waukegan	\$29.08
Suburban	\$1.97		
All	\$2.09	All	\$30.68
		Suburban	\$32.76
Safeway	\$2.51	Safeway	\$37.34
West Towns	\$2.78	West Towns	\$37.77

As can be seen, small municipal operations exhibited the lowest unit costs (Highland Park and Wilmette), while most larger carriers generated higher unit costs (Safeway and West Towns). It can also be seen that the rank of some carriers changes according to operating unit used, presumably the result of different operating speeds.

As a means of diagnosing overall high unit costs, Tables IV-3, IV-4, and IV-5 present data according to specific activities. Expense per vehicle hour is used in measuring Operations and Administration unit costs, while expense per vehicle mile is shown for Vehicle Maintenance unit costs. Top operator wage is presented on Table IV-3, Operations, for informational purposes. Carrier costs that exceed system-wide averages by more than 25% may be summarized as follows:

Operations

Operator Labor:	West Towns
Other Labor:	Elgin, Wilmette, Waukegan, Suburban, Safeway
Fringe Benefits:	West Towns
Other Operations:	NORTRAN, Suburban

Vehicle Maintenance

Labor:	West Towns, Safeway
Fringe Benefits:	West Towns, Safeway
Materials & Supplies:	Aurora, West Towns
Other Maintenance:	Highland Park, Elgin

Administration

Labor:	Highland Park, Suburban, Joliet
Fringe Benefits:	Highland Park, Suburban, Joliet, SafeWay
Services:	Joliet, Waukegan, SafeWay
Utilities:	Suburban, Waukegan, SafeWay
Insurance:	Joliet
Taxes:	West Towns, Waukegan, SafeWay
Non Vehicle Maintenance:	West Towns, Suburban, SafeWay
Other Administration:	Highland Park, West Towns, Suburban

Carrier functions identified as having relatively high unit costs (as derived on the basis of data in Tables IV-3, IV-4, and IV-5) should be carefully reviewed by appropriate departments to determine underlying causes and/or explanatory conditions. In cases where high unit costs are found to be unacceptable (i.e., no justification was apparent), necessary analysis should be conducted to formulate possible corrective actions.

TABLE IV-3: OPERATIONS EXPENSES PER VEHICLE HOUR (JANUARY-MARCH, 1982) - Ranked By Carrier

<u>Carrier</u>	<u>Total*</u>	<u>Operator Labor</u>	<u>Other Labor</u>	<u>Fringe Benefits</u>	<u>Other Operations</u>	<u>Top Operator Wage**</u>

*Totals may not add due to rounding.

**Non-vehicle maintenance labor and fringe benefit expenses are not included.

***Does not include RTA consolidated insurance program expenses. All carriers listed participate in this program, with the exception of Joliet.

APPENDIX A

SUBURBAN BUS ROUTE RIDERSHIP BY SERVICE DAY JANUARY-MARCH, 1981 AND 1982

The data presented in this Appendix is categorized according to the following three service groupings:

- Inner Suburban Services (IN): includes most regular fixed-route services operating in Cook County. Northwest Cook County routes are not included in this category, since services, population densities, and land use distribution are more in common with those found in the collar counties.
- Outlying Suburban Services (OT): includes all regular fixed-route services operating in the five collar counties and Northwest Cook County; and
- Feeder Services (FD): a generic classification of service, including all routes providing an exclusively commuter rail feeder function.

A Region map illustrating Inner Suburban and Outlying Suburban areas is shown on Figure 1. Although feeder routes operate throughout the suburbs, most serve Outlying Suburban areas.
